Docket No. INVE-2996

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Applicant: Bhate *et al.*

Group Art Unit: 2838

Filed: 6/15/2001

Examiner: Sterrett, Jeffrey L.

Serial No.: 09/882,188

Title: **HIGH POWER DENSITY INVERTER AND COMPONENTS THEREOF**

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Sir:

RESTRICTION ELECTION

In response to the Restriction Requirement dated October 27, 2004, Applicants hereby provisionally elect Group I, claims 1-19 and 33-40, drawn to a switching power supply, classified in class 363, subclass 134. This election is made with traverse, and Applicants hereby reserve the right to file a divisional application in connection with unelected claims 20-27, drawn to a fluid cooled heat sink; claims 28 and 29, drawn to an assembly; claims 30-32, drawn to an inductor/transformer combination; and claims 41-47, drawn to a linear fluid cooled heat sink forming method.

With regard to the Restriction Requirement, Applicants respectfully submit that the subject matter of all claims 1-47 is sufficiently related that a thorough search for the subject matter of any one group of claims would encompass a search for the subject matter of the remaining claims. Thus, Applicants respectfully submit that the search and the examination of the entire application could be made without serious burden. See MPEP § 803, in which it is stated

09/882,188

1

that "if the search and examination of the entire application can be made without serious burden, the Examiner must examine it on the merits." Applicants respectfully submit that this policy should apply in the present application in order to avoid unnecessary delay and expense to Applicants and duplicative examination by the Patent Office.

Should the Examiner require or request anything further from Applicants prior to examination, the Examiner is requested to contact Applicants' undersigned representative at the telephone number below. Otherwise, Applicants request early and favorable examination on the merits.

Date: 11/22/2004
